

KNEE PAD // STANDARD SERIES PROTECTION WHERE YOU KNEED IT.

For us, “standard” means right for the duty at hand. You don’t skimp on the details. After all, this isn’t about learning to crawl, it’s about crawling in to bed at night and not rolling out in the morning feeling like you’ve already put in your honest 10. With these bad boys, you can count on thick padding and durability, plus all the flexibility and first-rate fit workers demand. Hey, joint jarring jobs—we got your number.

FEATURES AND BENEFITS

A variety of cap options for every application. All models include the following features:

- 840D Nylon fabric cover
- 12mm NBR foam padding
- Anti-odor treatment
- Nickel-plated grommets
- Hook and loop or buckle closures

STANDARD SERIES INCLUDES: 300 ROUND HARD CAP // 315 LONG TEXTURED HARD CAP // 325 NON-MARRING RUBBER CAP // 335 SLIP-RESISTANT RUBBER CAP // 340 SLIP-RESISTANT WITH SHIN PAD.

**DESPITE WHAT
THEY SAY,
ROUNDER IS BETTER.**

Well, when it comes to knee caps that is. Many of Ergodyne’s ProFlex® Standard Series knee pads now feature an improved cap design with additional curvature. We also added deep V-cuts to the NBR foam padding to help the knee pad better hug the workers knee and prevent the knee pads from sliding out of position. These improvements deliver better overall knee health, increased comfort and enhanced worker productivity. C’mon, show your knees you care!

KNEE PAD // STANDARD SERIES

CHOOSE YOUR CAP

	ACTION	APPLICATION EXAMPLE	FEATURES & BENEFITS
 300/300HL SHORT ROUNDED HARD CAP	Pivoting, swiveling, rocking, and sliding.	Freight// Baggage	840D Nylon fabric cover // Tough and durable yet thin and flexible; inherently water-resistant to prevent liquid absorption
 315/315HL LONG TEXTURED HARD CAP	Pivoting, rocking, and sliding where additional knee protection is desired.	Construction// Masonry	12mm NBR foam padding with V-cuts // Thick, durable nitrile butadiene rubber (NBR) foam padding provides cushion, comfort and support; V-cut foam design better hugs the knee
 325/325HL NON-MARRING RUBBER CAP	Kneeling on delicate surfaces.	Flooring — especially on hard wood floors or tile where cap will not scratch.	Nickel-plated grommets // Durable and rust resistant Anti-odor treatment // Knee-side surface treated to inhibit odor-causing bacterial growth
 335/335HL SLIP RESISTANT RUBBER CAP	Grips well on both wet or dry work surfaces. Protects knees against rock and debris on rough surfaces. Allows the worker to rock and lean without slipping.	Plumbing and other kneeling applications in liquid.	Hook and loop or buckle closures // Hook and loop is non-marring; buckles are infinitely variable, won't snag on carpet or pick up debris; both closures adjust quickly for a comfortable fit
 340 SLIP RESISTANT W/ SHIN PAD		Plumbing and other kneeling applications in liquid with added shin protection.	Same features and benefits above with extended shin protection and buckle closure.
