

TRIMMEX CERACUT

NO. 170171

Application

Ceramic for deburring. With a concave blade.

Why are ceramic blades ideal for deburring plastics and metals? Because they are very resistant und durable due to their enormous hardness. That's why the TRIMMEX CERACUT can smooth edges and remove sprayed points and separation lines from mould halves. Furthermore, the characteristic grinding of the MARTOR ceramic blade minimizes your personal risk of injury.

PRODUCT DETAILS

Installed blade

NO. 171
1.70 mm, acid resistant

Optional blade

NO. 170
1.70 mm, acid resistant
