PRODUCT SPECIFICATION

REF   51030127   SALVEQUICK DETECTABLE PLASTER

1   GENERAL PRODUCT DESCRIPTION

Description
Detectable, adhesive bandages (plasters), of two sizes, medium and senior, packed in a cardboard refill intended for the Cederroth (Salvequick) dispenser for adhesive bandages.

The Salvequick Detectable bandages are detectable by most common metal detectors and the blue color also makes them easy to detect visually, which makes these plasters suitable for restaurants and the food industry. The plasters can easily be pulled out with just one hand and applied on the wound.

The adhesive bandages consist of a backing, evenly spread with an adhesive coating and with an absorbent pad fixed centrally to the dressing. When the adhesive bandage is pulled out from the package, the lower cover will remain behind. Thus one half of the bandage can be applied with one hand and after removing the rest of the cover the plaster is ready for use.

Storage information
Dry storage in room temperature. For maximum protection, keep in original package until use.

2   DETAILED PRODUCT INFORMATION

Content per consumer unit

Product/Material	Quantity (pcs)	Dimensions (mm)	
Refill packages	6	30 x 88 x 100	
Per refill package:		Dressing	Wound Pad
