SAFETY BUMP CAP

CASQUETTE ANTI-HEURT

**ALL
SEASON**

TECHNICAL SHEET

The Surfex® bump cap **ALL SEASON** consists of an ergonomic "Scarap" shell certified ABS (Acrylonitrile Butadiene Styrene). Designed for optimum comfort, its EVA foam absorbs and cushions blows to the head. Its ventilation system on both sides prevents the build up of moisture.

Made of 100% Nylon or Polyester (with Velcro surrounding the shell) it is easy to slip on and remove the outer shell in the textile cap.

UTILIZATION :

This product is in agreement with the protection requirements of users for applications in commercial, industrial or recreational works whose risks have a low impact. This product is certified **EN 812** (European agreement).

EN 812 specifies the physical and performance requirements, test methods and marking requirements of the safety bump cap for the industry. It benefits from the **European conformity** but cannot in any case replace the protection helmet of industry according to EN 397. They are used in the industry to protect the head when it hits hard and static objects that can stun or cause lacerations and superficial injury to the wearer.

Much **lighter** and more **comfortable** to wear every day, users will have extra motivation to wear their protective gear. Thus, the bum cap Surfex provides additional **safety** that can influence the **brand image** of the company but also the **well-being of wearer**.

COMBINATION :

Thanks to its scalloped form at the ears and its rigid shell, this cap has been designed and developed to allow its wearers to use any other types of personal protective equipment such as protection glasses, breathing masks, noise-cancelling headphones, etc.
