

POLYTRIL™ AIR

Characteristics

Black polyamide knitted glove.
 Black foam nitrile coating on palm and fingertips.
 Elastic knitted wrist.
 Gauge 13.
 Length : 25 cm.

Advantages

Confort

The ergonomics seamless knit construction conforms better to the natural shape of the hand for greater strength and durability, superior confort and ventilation.

The lighth weight weave enhanced ventilation keeps hands cool and dry. With the ergonomical design the gloves conform to the the natural shape of the hand for a more comfortable fit and enables longer use and less fatigue.

Resistance

The filament yarn reduces linting for the most sensitive applications and easily laundered for extended use.

Lighth weight fibers provide superior tactile sensivity for precision handling and delicate operations.

The foam nitril coating provides superior and excellent grip and abrasion resistance.

Hygiene

The black color makes the glove less dirty.
 The open back provides superior ventilation.
