**DUAL ACTION INSOLES
ANTIBACTERIAL, ANTI-ODOURS
« CLASSIC »**

❶ DESCRIPTION OF THE PRODUCT

▫ COMPOSITION :

- Upside layer: Non-woven fabric, grey color, 100% polyester with SANITIZED®-treatment, and binding long-life acrylic agent protecting from abrasion.
Weight per surface area: 440 g/m² +/- 5%
- Downside layer : latex foam with active charcoal and SANITIZED®-treatment.
- Downside layer covered with an anti-slidding treatment to ensure a perfect fitting in the shoes.

Total thickness: 4.7 mm +/- 10%

❷ TREATMENT AND PROPERTIES

The **active & exclusive treatment from Groupe JLF** offers an active protection against the main germs responsible for infectious phenomena of the skin.

- Solution of imprégnation for Adults exclusivity of Groupe JLF
- Solution of imprégnation for Children exclusivity of Groupe JLF

This solution brings supplementary guarantees in the fight against bacterial strains responsible for the development of bad odours on the feet.

Use for :

- Hygiene of the shoes (deodorizing, aseptising, refreshing)
- Prevention and neutralization of bad odours (fixing odours + very strong antibacterial properties)

Results of the Laboratory CTC Tests (tolerance +/- 10 %)

Tests	Standards	Method	Results
Absorption	EN 12746		188 mg/cm ²
Desorption	EN 12746	% eau après 16 h	100 %
Resistance to abrasion	EN 13520	Cycles to make a hole	
		Dry environment tested	>25 600
		Humidity environment tested	>12 800

③ PRODUCT EFFECTIVENESS : 3 months

- This duration may vary depending on : the intensity of sweat, acid PH, nature of the footwear, personal body hygiene ...
- Non washable insole (treated insole).

④ INSTRUCTIONS :

- Grey fabric side up in touch with the foot.
- For a better comfort and efficacy, you are advise to alternate each day your pair of insoles or take them of the shoes to allow them to dry.
