

TECHNICAL DATASHEET

FIRSTBASE 3 – HC24 CLASSIC BUMP PROTECTION CAP

DESCRIPTION

FirstBase 3 is the third generation of Scott Safety's pioneering baseball style bump protection cap, designed and approved in accordance with EN812. The FirstBase 3 HC24 variant has been designed in partnership with some of the world's leading companies to deliver the perfect balance of comfort, protection and style; promoting the highest degree of wearer acceptance.

APPLICATIONS

The FirstBase 3 bump cap range is designed to provide protection against the effects of striking the head against hard, stationary objects which can cause lacerations or other superficial injuries. Bump caps are not intended to provide protection against the effects of falling or thrown objects or suspended loads and does not offer the same protection level as an industrial safety helmet as specified in EN397.

Typical applications and environments that utilise baseball style bump protection include manufacture and maintenance in the aerospace, automotive and facilities maintenance sectors, transportation and logistics workers, tradesmen working in environments without the risk of falling objects and government institutions such as the Police.

TECHNICAL SPECIFICATION		WASHING & CARE	
Shell Style	Flexible	 <p>FirstBase 3 HC24 Classic is machine washable. Please adhere to the washing instructions above.</p>	
Colours	Navy Blue, Black, Grey, Royal Blue, Green, Red, White		
Weight	200g SP, 190g RP, 180g MP		
Shell Material	ABS (approved)		
Fabric	100% Polyester		
Colour Fastness	4/5*		
Sweatband	Wicking Fabric - 56.5% Polyester, 43.5% Minerale		
Foam	Ethylene Vinyl Acetate (EVA)		
Adjustment Strap	Elastic		
Adjustment Buckle	POM (Polyacetal)		
Peak Lengths	SP 70mm, RP 55mm, MP 25mm		
Embroidery	Cotton / Polyester Thread

COLOUR FASTNESS

Colour fastness is a measure of how permanent a colour is on fabric. Generally the main causes of fabric fade are from washing and light degradation. When evaluating all forms of colour change a scale of 1-8 is used, '1' indicates very low colour fastness (maximum colour change) and '8' indicates very high light fastness (minimum colour change). All FirstBase 3 fabrics have been tested for colour fastness against ISO 105 and have received overall colour fastness ratings of a level 4. These ratings are in line with globally accepted colour fastness ratings for apparel in Europe, US, Canada, Australia and Japan, which require a rating of 3-4.
