

# Safety Eyewear

Uvex

Made in  
GERMANY  
CE EN 166  
94/27/EEC

# uvex i-gonomics

## Measurable stress reduction for safety goggles

The innovative uvex i-gonomics product system sets new standards in ergonomics, delivering perfect fit, light weight and optimum temperature. Goggles are comfortable and remain fog free even during periods of physical exertion which increases wearer well-being and enables you to get on with the job at hand.

# uvex u-sonic

The uvex u-sonic innovative soft seal adapts to the face for a customised, non-irritating fit without pressure points. The unrivalled anti-fog lens coating ensures that the compact wide-vision goggle boasts an impressive RI value of 4.40 in comparison with other wide-vision safety eyewear.

### force

- Test method: tensile force of headband\*
- Test result: seal pressure: 21 N (IV 4.2)

- Perfect fit without any irritating pressure points

\* independently tested by the Chemnitz Technical University

## Relief-Index

# 4.40

The relief index is calculated using the mean value of the three index values (IV) for force, weight and temperature – ranging from 0 (= poor) to 5 (=perfect).

### weight

- Test method: weighing the product
- Test result: product weight = 69 g (IV 4.2)
- Comfortable to wear, reducing onset of fatigue

### clima

- Test method: uvex "Anti-fog" benchmark test
- Test result: AntiFog performance = 29 points (IV 4.8)
- Fog-free view even under extreme conditions

## uvex supravision plus

### Core Coatings

#### uvex supravision sapphire

Coated lenses are extremely scratch resistant on both sides and offer excellent resistance to chemicals. The coating system, which has been enhanced using nanotechnology, offers significantly increased non-stick properties and subsequently are easier to clean. Aqueous and oily dirt can be removed effortlessly.

#### uvex supravision excellence

Coated lenses are anti-fog (for at least 16 seconds) on the inside, while the outside offers extreme scratch and chemical resistance. The anti-fogging properties are permanent even after repeated cleaning. The lenses are also easy to clean and less susceptible to dirt due to the non-stick nanotechnology.

#### uvex supravision plus

Coated lenses have advanced anti-fog performance (at least 30 seconds) on both sides, scratch-resistant and antistatic. The anti-fogging properties are permanent, even after being repeatedly cleaned. This lens coating is suitable for areas with high humidity.

# dirty

## Coating technology

## Special coatings

### **uvex supravision extreme**

Coated lenses are scratch-resistant on the outside and permanently anti-fog on the inside. Lenses will not fog up as the coating never reaches the point of saturation. Ideally suited for workplace environments with long-lasting exposure to condensation and a high degree of dirt.

### **uvex supravision variomatic**

Coated lenses are self-tinting filters, which automatically become darker when exposed to UV (within 10 seconds) and become lighter when exposure is reduced (after 30 seconds). Now available with the tried and tested uvex supravision excellence technology (permanently anti-fog on the inside and extremely scratch-resistant on the outside). Particularly suitable for workplaces where you frequently move between indoor and outdoor environments, from light to dark.

### **uvex supravision clean**

Coated lenses are autoclavable and resistant to chemicals. Anti-fog on the inside, extremely scratch-resistant on the outside. The anti-fog properties last for at least 10 autoclave cycles. The coating ensures complete fog protection and maximum vision.

### **uvex infradur**

Coated lenses are scratch-resistant on both sides and minimise damage from welding sparks.

### **uvex infradur plus**

Coated lenses are anti-fog on the inside, extremely scratch-resistant on the outside and minimise damage from welding sparks.

## Lens tinting Characteristics

### CLEAR

Protection: UV/marketing: 2(C)-1.2  
Transmission: approx. 91%  
Standards: EN 166, EN 170  
**Anti-glare mechanical hazard protection**

### AMBER

Protection: UV/marketing: 2(C)-1.2  
Transmission: approx. 88%  
Standards: EN 166, EN 170  
**Anti-glare mechanical hazard protection with contrast adjustment**

### LIGHT BLUE

Protection: UV/marketing: 2(C)-1.2  
Transmission: approx. 85%  
Standards: EN 166, EN 170  
**Protection offering relaxing, focussed vision**

### AR (anti-reflective)

Protection: UV/marketing: 2(C)-1.2  
Transmission: approx. 96.5%  
Standards: EN 166, EN 170  
**Optimum anti-reflective protection with high degree of light transmission**

### SILVER MIRROR 53 %

Protection: UV/marketing: 5-1.7  
Transmission: 53%  
Standards: EN 166, EN 172  
**Protection in changing light conditions**

### SILVER MIRROR 12 %

Protection: UV/marketing: 5-3.1  
Transmission: 12%  
Standards: EN 166, EN 172  
**Protection from both highly artificial and natural glare conditions**

### POLAVISION

Protection: UV/marketing: 5-3.1  
Transmission: 14%  
Standards: EN 166, EN 172  
**Reduction of irritating surface reflection by filtering scattered light**

### GREY 14% / GREY23 %

Protection: UV/marketing: 5-3.1/5-2.5  
Transmission: 14%/23%  
Standards: EN 166, EN 172  
**Protection against natural glare with signal colour recognition**

### BROWN

Protection: UV/marketing: 5-2.5  
Transmission: 20%  
Standards: EN 166, EN 172  
**Protection against natural glare with signal colour recognition and increased contrast effect**

### VARIOMATIC

Protection: UV/marketing: 5-1.1<2  
Transmission: 12-86%  
Standards: EN 166, EN 172  
**Fast accommodation of changing UV irradiation conditions: automatic lens darkening (10 s) and lightening (30 s)**

### WELDING PROTECTION, GREY

Protection: UV/welding shades: 1.7/3/4/5/6  
Transmission: 1 - 43%  
Standards: EN 166, EN 169  
**Protection against IR and UV irradiation (glare) with perfect colour recognition**

### UV PROTECTION

**uv-ex** = ultraviolet excluded  
Direct integration of UV absorption filters in the raw material 100% protection against UV irradiation up to 400 nm. All uvex lenses offer 100% UVA, UVB and UVC protection.

# Safety spectacles – matching your corporate identity

## Eye protection with “personality”

Give your team an unmistakeable image: uvex safety glasses offer various options for individual design – from printing your company's logo on the side arms to frames in your company's colours. You can coordinate your protective equipment perfectly with your corporate identity.

### Frames in the company colours

“Your” safety spectacles are recognisable at first glance: the frames are designed in your company colours.

### Insert in the side arms

Adding your company name to the soft components of the side arms is bespoke and subtle.

### Pad printing on the side arms

(1 to 4 colours)

The direct pad printing process is recommended for printing your logo in colour on the side arms.

### Customised accessories

Have your logo printed on your spectacle case.

### Laser engraving on the lens

Safety spectacles will retain 100% of their functionality even with customised laser engraving.

### Headband embroidery

Customise your spectacles by having your corporate logo embroidered on the headband.

# uvex i-3 AR

Taking the wearer experience to a new level

#### Side arm inclination

The variable side arm inclination allows flexible adjustment to individual requirements and optimum coverage of the eyes. The Softflex ear pieces ensure a secure and pressure-free fit.

#### Coating

The anti-reflective coating on both sides provides 100% protection against UV 400 and a transmission factor of more than 96.5%, which means distracting reflections are effectively prevented.

Ensuring the eyes are also wide awake.

uvex i-3 AR are innovative safety spectacles with anti-reflective coating on both sides of the lenses. The high light conductivity ensures perfect vision at all times, for example when reading test parameters or working with highly reflective components. Strain on the eyes is reduced and the wearer will find it easier to focus.

These spectacles are particularly suitable for workplaces with a combination of artificial and natural light. In combination with exceptional wearer properties, this means the uvex i-3 AR has all the prerequisites of safety spectacles that people enjoy wearing. They always allow a clear view of what matters.

#### Transmission (transparency)

With the anti-reflective coating, the uvex i-3 AR reaches a higher transmission factor than safety spectacles with regular coating technology – ensuring perfect vision without reflections.

#### Extra frame

The clip in frames with soft padding can be ordered separately, with different frames available for the uvex pheos and uvex pheos s models respectively. Please ensure correct frame is selected when ordering (uvex pheos/uvex pheos s).

#### Headband

The headband can be adapted for both uvex pheos and uvex pheos s models. The headband can be easily removed.

This exciting eyewear concept unites innovative technologies and high-tech materials.

- The world's lightest safety spectacles – only 18g – the same weight as a CD
- Wraparound style. Lenses have ideal aerodynamics and are angled forwards to provide excellent ventilation, enhancing comfort around the eye
- uvex x-stream technology – side arms graduate from hard to soft material – grips the head for a secure non slip fit
- Exceptional optical clarity due to extremely thin lenses
- 100% metal free

## uvex CR

Autoclave safety eyewear that goes further

Innovative coating technology – the first autoclavable safety eyewear with anti-fog performance

uvex has developed the first autoclavable safety goggles with anti-fog coating for specialist requirements in laboratories, clinics, cleanrooms and food manufacturing.

From ultra-light safety spectacles to goggles with a panorama lens, uvex CR is the ideal safety eyewear for all areas of application and specifically designed for repeated autoclave sterilisation.

**uvex CR – professional safety eyewear which complements hygiene standards.**

**uvex super fit CR · 9178**

- Wide panoramic field of vision
- XST side arms graduate from hard to soft material – grips the head for a secure non slip fit
- Increased compatibility with other items of PPE

# uvex academy

## Industrial protective eyewear

---

### A practical introductory seminar on the use of PPE products for eye protection.

- The basic applications of PPE eyewear, including products that protect against mechanical dangers, chemicals and radiation (e.g. welding protection), and products designed for specialised applications
- Demonstration and assessment of the dangers posed by mechanical finishing, infrared and ultraviolet radiation (e.g. encountered during welding or in chemicals), illustrated by case studies
- Assessment of the risk of eye injury in the workplace
- Explanation of how these risks can be dealt with efficiently in each workplace
- Comprehensive overview of the requirements of industrial protective eyewear, standards, applications, risk assessment and how to care for protective eyewear
- Information on the classification of protection products based on their labelling and the areas of application of the various types of equipment

**Target group**

Those responsible for the work-related health and safety of employees within a company, e.g. health and safety officers and specialist purchasers.

# Safety Spectacles

uvex polavision · uvex cybric · uvex cyberguard

9231.960

## uvex polavision · 9231

### Improving recognition

- Comfortable twin-lens spectacle
- Polarisation filter reliably protects against eye strain
- Particularly suitable for reflective surfaces (offshore, maritime conditions)
- Protects against reflections and optical irritations outdoors (e.g. water surfaces) for greater visual comfort

|          |   |

## uvex cybric · uvex cyberguard · 9188

- Robust, sporty twin-lens safety spectacle design
- Wraparound lens offers excellent field of vision for improved safety
- Four pads of the uvex quattroflex temple in the sensitive ear region ensure a comfortable, pressure-free fit
- Fully adjustable side arms enable the wear to achieve an individual fit
- Straight side arms grip the side of the head not behind the ears for a secure, comfortable, none slip fit

## uvex u-sonic

Perfect fit, light weight, optimal temperature

As a result of its ergonomic design with flexible soft components, uvex u-sonic adapts perfectly to any face shape – its light weight and the lack of pressure make it especially pleasant to wear. The wide panoramic lens can be replaced: the integrated magnet technology facilitates rapid lens exchange.

**A viewing pane**  
**can be rapidly attached**  
using integrated magnet technology  
(grey glare protection 16 %).

**Optimum wearer comfort**  
through even pressure distribution.

**Anti-fog**  
Via the uvex supravision coating.

**Scratch-resistant**  
thanks to uvex supravision.

**Eye area is very comfortable**  
thanks to innovative ventilation system.

**Ideally suited for combination with safety helmet**  
on account of its compact design.

**MADE IN GERMANY** ■■■

## uvex ultravision · 9301

- Ergonomic wide-vision goggles with unrestricted peripheral vision
- Sophisticated ventilation system ensures exceptional wearer comfort
- Optional anti-fog lenses
- Lens replacement possible
- Outstanding close and pressure-free fit
- Special models available:
  - with tear-off lenses 9301.813
  - with additional comfort cushioning 9301.716
  - yellow gas-tight version 9301.613
  - with wide nose piece for combination with dust masks 9301.906
- Mechanical strength:  
PC lenses: B – Medium energy impact protection (120 m/s)  
CA lenses: F – Low energy impact protection (45 m/s)

### 9301.544

With helmet adaptor to combine with uvex airwing safety helmet and ear defenders uvex 2H, uvex 3H and uvex 3200H. Helmet and hearing protection not included!

# laservision

Innovative laser protection solutions

Rapid developments in laser technology mean that laser protection is becoming ever more important in terms of personal safety. New laser applications in all areas of industry, research and medicine demand new and unique safety and protection solutions. laservision, a member of the uvex group is one of the leading global producers of laser protection products. It develops, manufactures and distributes laser protection glasses, large-scale laser protection (mobile screens and safety curtains), small filters and cabin windows for all laser types and applications.

## Laser protective spectacles and cabin windows

Based on physical properties, such as radiation intensity and focusing capability (spatial coherence), laser light is potentially very hazardous, particularly for the eyes. The valid laser protective norms (EN 207 and EN 208) and safety regulations (BGV B2) stipulating the wearing of laser safety eyewear are the response to these hazards.

This laser safety eyewear with coated or absorbent special lenses and plastics is a core focus of the laservision product portfolio. We have more than 30 years of experience in this technology. At the same time, laservision offers an extensive range of glass and plastic filter materials as windows for installation in machine housings, partitions and curtains.

## Active protection systems

For automated laser processing operations, i.e. operations which are not under constant surveillance, to be classified as test class T1, European standard EN 60825-4 housing must maintain a survival rate of 30,000 seconds. However, where laser output and radiation intensity are constantly on the increase, rates of this order are no longer achievable with passive protection systems, particularly in the case of window materials.

The newly patented active cabin window system from laservision provides the ideal and simplest solution to this problem in the form of integrated electronics installed within the safety circuitry of the laser system.

When laser beams hit the plastic pane with enough output to activate the sensor integrated in the frame, the laser is immediately switched off before hazardous radiation can be transmitted through the pane. The system gives users a complete CE-certified class T1 system in line with the applicable machine construction directive. In combination with an active cabin wall system, this makes a complete and certifiable solution available for industrial high-performance laser units operating in the 820 to 1100 nm wavelength spectrum.

## Screens

Alternatively, it is possible to screen out laser radiation by mechanical means and to protect potentially endangered personnel during laser operation in this way. Screening against laser radiation may take the form of curtains, partitions or even fixed insulating walls. These can be installed in the workplace, or they may be integrated in machinery housing. laservision offers standard and customer-specific solutions for screening which comply with the applicable standards. On account of the wide range of possible materials and solutions, we advise our customers on their protection issues in situ at their own premises in order to find the best possible solution.

## Training

laservision, in cooperation with the uvex academy offers a programme of modular courses on laser safety. These feature compulsory annual laser safety training together with special courses for those responsible for laser safety, advanced customised seminars, an internship in laser safety and measuring techniques.

laservision is an active and knowledgeable partner for various National and International standards committees and takes part in domestic and International research projects in the field of laser safety in conjunction with research institutions.

# Welding Protection

A new generation of welding protection eyewear available with different grey-tint lenses and various protection classes. The innovative technology affords protection from UV and infrared light while maintaining perfect colour recognition in accordance with EN 172.

The special uvex infradur plus coating has anti-fog properties which prevents the inside of the lenses misting up and the extreme scratch-resistance on the outside keeps damage from welding sparks to an absolute minimum.

The welding safety eyewear fits the face perfectly and is extremely comfortable – enhancing the wearer's experience.

N.B.: Do not use for electric welding.

All welding products have polycarbonate lenses providing protection against impact as well as UV rays, IR rays and visible glare.

**The products do not provide protection against laser beams!**
